Chapter 1

The vngrape Package

This chapter describes the GAP package vngrape. It builds on the package GRAPE.

1.1 Functions

The following functions are available:

1.1.1 VNI2N

▷ VNI2N(*graph, index_or_list_of_indices*)   (function)

   converts all indices in x to vertex names

1.1.2 VNN2I

▷ VNN2I(*graph, name_or_list_of_names*)   (function)

   converts all names in x to its indices
